NOTIFICATION OF TRANSMITTAL OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(PCT Rule 71.1)

Date of mailing

(day/month/year)

24.05.2005

Applicant's or agent's file reference

W5039-020 JA

IMPORTANT NOTIFICATION

International application No. PCT/EP2004/006405

International filing date (day/month/year)

Priority date (day/month/year)

15.06.2004

26.06.2003

Applicant

SONY ERICSSON MOBILE COMMUNICATIONS AB et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/EP2004/006405

IAP20 Rec'd PCT/PTO 22 DEC 2005

	Box	No. I Basis of the report				
1.	With regard to the language , this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.					
		 This report is based on translations from the original language into the following language, which is the language of a translation furnished for the purposes of: □ international search (under Rules 12.3 and 23.1(b)) □ publication of the international application (under Rule 12.4) □ international preliminary examination (under Rules 55.2 and/or 55.3) 				
2.	With regard to the elements* of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):					
Description, Pages						
	1-9		as originally filed			
	Clai	ims, Numbers				
	1-9		received on 29.04.2005 with letter of 26.04.2005			
Drawings, Sheets						
	1/5-	5/5	as originally filed			
		a sequence listing and/or ar	ny related table(s) - see Supplemental Box Relating to Sequence Listing			
3.		The amendments have resu	ulted in the cancellation of:			
		☐ the description, pages☐ the claims, Nos.	_			
		☐ the drawings, sheets/figs				
		☐ the sequence listing (specific any table(s) related to see	ecify): equence listing <i>(specify)</i> :			
4.	□ hac Sup	had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).				
		☐ the description, pages ☐ the claims, Nos.				
		☐ the drawings, sheets/figs☐ the sequence listing (spe☐ any table(s) related to se	ecify):			
	*	•	ome or all of these sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

IAP20 Rec'd MT/PTO 22 DEC 2005 International application No.

PCT/EP2004/006405

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following document:

D1: EP-A-0 750 274 (SUMITOMO WIRING SYSTEMS) 27 December 1996 (1996-12-27)

Document D1, which is considered to represent the most relevant state of the art, discloses a switch dome device from which the subject-matter of claim 1 differs in that the outputs of adjacent switch domes are operatively connected to inputs of a common AND-circuit, wherein said switch dome device is responsive only to two adjacent switch domes actuated at a time.

The subject-matter of claim 1 is therefore new (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as providing an alternative joystick-device which <u>exclusively</u> operates upon simultaneous operation of two adjacent switch domes.

The solution to this problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

No hint for this solution could be found in the present prior art.

Claims 2-9 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

10/561633

IAP20 Rec'd PCT/PTO 22 DEC 2005

CLAIMS

1. A switch dome device for operating functions in an electronic equipment (10), said device comprising a set of switch domes (4) mounted in a circular pattern on a support structure (5), characterized in that outputs of adjacent switch domes (4) are operatively connected to inputs of a common AND circuit (9), wherein said switch dome device is arranged to be responsive to only two adjacent switch domes actuated at a time for operating a function.

10

2. A switch dome device according to claim 1, wherein said switch domes (4) are equally distributed around said circular pattern with the same distance to the centre (8) of said circular pattern.

15

3. A switch dome device according to claim 1 or 2, wherein said set of switch domes comprises eight switch domes (4).

20

4. An input device (1) for operating functions in an electronic equipment (10), comprising a switch dome device and a switch dome actuator (2) for actuating switch domes (4), characterized in that said switch dome device is a switch dome device according to any of the claims 1-3.

25

5. An input device according to claim 4, wherein said actuator (1) is a rocker key provided with actuator bosses (6) for actuating said switch domes (4).

30

- 6. An input device according to claim 4, wherein said actuator (1) is a joystick.
- 7. An electronic equipment, characterized by an input device (1) according to any of the claims 4-6.

35

2

- 8. An electronic equipment according to claim 7, wherein the switch domes (4) are positioned on the support structure (5) on 22,5/67,5/112,5/157,5/202,5/247,5/292,5/337,5° positions around the circular pattern with respect to the orientation of a display (11) of the electronic equipment held in a position for normal operation by a user.
- 9. An electronic equipment according to claim 7 or 8, 10 wherein the electronic equipment is a mobile radio terminal (10).
